(54) Title: METHOD AND APPLICATION FOR ARRANGING A CONFERENCE CALL IN A CELLULAR NETWORK AND
A MOBILE TERMINAL OPERATING IN A CELLULAR NETWORK

(57) Abstract: The invention relates to a method for ar-
ranging a conference call with mobile terminals (200) op-
erating in a cellular network (100). At first, a group of
the participants of the conference call is formed either by
selecting the participants from a list saved in the mem-
ory of the mobile terminal or by inputting the contact in-
formation of the participants manually. In the next step,
a summons to the conference call is drawn up in stan-
dard form. An application (300) loaded into the memory
(220) of the convener's mobile terminal forms the sum-
mons, and sends the summons to the participants via the
cellular network. When a participant wants to join a con-
ference call, he/she makes a call with the mobile termi-
nal to the telephone number mentioned in the summons.
An application in the mobile terminal of the convener re-
ceives the incoming calls and joins them to the conference
call automatically.
